Poison Information Centres can provide additional assistance on 13 11 26 (Australia wide).

Eye: Irrigate thoroughly with water for at least 10 minutes. If discomfort persists obtain medical attention.

Inhalation: Remove from exposure, rest and keep warm. In severe cases obtain medical attention.

Skin: Wash off skin thoroughly with water. Remove contaminated clothing and wash before re-use. In severe cases, OBTAIN MEDICAL ATTENTION.

Ingestion: Wash out mouth thoroughly with water and give plenty of water to drink. OBTAIN MEDICAL ATTENTION.

Facilities: Eye wash facilities and safety shower are recommended.

Section 5 - Fire Fighting Measures

Suitable extinguishing media: Foam, dry powder, carbon dioxide or vaporising liquids

Hazards from combustion products: May evolve toxic gases (hydrocarbons, carbon oxides) if burning.

Precautions and special protective equipment: Evacuate area and contact emergency services. Remain upwind and notify those downwind of hazard. Wear full protective equipment including Self Contained Breathing Apparatus when combating fire. Use waterfog to cool intact containers and nearby storage areas.

Hazchem code: 3 [Y]

Section 6 - Accidental Release Measures

Spillage: In case of spillage (bulk), wear splash-proof goggles, PVC/rubber gloves, coveralls and rubber boots (see section 8). Keep people away, evacuate area. Shut off all sources of ignition.

Containment and clean up: Absorb spill with sand or similar, collect and place in sealable containers using non-sparking tools and transport outdoors for disposal. Ventilate area and wash spill site after material pick-up is complete. Prevent spill from entering drains or waterways. Caution: slippery when spilt.

Section 7 - Handling and Storage

Handling: Measures should be taken to prevent materials from being splashed into the eyes or on the Skin. Wear eye-shields and protective clothing. Smoking should not be permitted in work areas. Provide adequate ventilation. **Storage:** Store in a cool, dry, well-ventilated area, away from oxidising agents (eg hypochlorites), acids (eg sulfuric acid), heat and light sources, and foodstuffs. Ensure containers are adequately labelled, protected from physical damage and sealed when not in use. Keep only in original container. Check regularly for leaks or spills. This material is a Scheduled Poison (S6) and must be stored, maintained and used in accordance with the relevant regulations. Where vapours or mists are generated, particularly in enclosed areas, and natural ventilation is inadequate, a flame proof exhaust ventilation system is required. Refer to AS 1 940-The storage and handling of flammable and combustible liquids and AS 2430-Explosive gas atmospheres for

940-The storage and handling of flammable and combustible liquids and AS 2430-Explosive gas atmospheres for further information concerning ventilation requirements.

Section 8 - Exposure Controls and Personal Protection

National exposure standards: No exposure standard allocated

Biological limits: No biological limit allocated

Engineering controls: Ensure adequate ventilation. In poorly ventilated areas, mechanical explosion-proof extraction ventilation is recommended. Keep containers closed when not in use.

PPE: Wear coveralls, splash-proof goggles and PVC or rubber gloves. Where an inhalation risk exists, use respirators in accordance with AS 1716 - Respiratory Protective Devices, selected in accordance with AS 1715 -Selection, Use and Maintenance of Respiratory Protective Devices (Type A organic vapour and dust/mist filters). In a laboratory situation, wear a laboratory coat
